

**Question for written answer E-015973/2015
to the Commission**
Rule 130
Theodoros Zagorakis (PPE)

Subject: European Week of Sport - School Sports Day

The European Week of Sport is a new initiative by the Commission, organised every year in order to promote a healthier lifestyle, which includes physical exercise. During the week in question, initiatives are organised for everyone, regardless of age, social background or fitness level.

As it arises from the recent evaluation report for the first Week of Sport, which took place from 7 to 13 September 2015, the initiative's outcome was considered particularly successful, while other sectors – which could be leveraged in the future – are also put forward.

Will the Commission say:

- How did the schools of Europe participate in the first European Week of Sport?
- What is its opinion on the idea of introducing a day, in the framework of the European Week of Sport, which will be solely dedicated to sport at school and in which all schools of Europe will participate?
