

**Question for written answer E-014975/2015
to the Commission**

Rule 130

Andrey Novakov (PPE)

Subject: EU budget oriented to performance and results

A key item on the agenda of Vice-President Georgieva is to increase the focus on EU budget performance and outcomes.

In this regard, what kind of methodology and indicators could the Commission use in order to measure outcomes of the EU budget investments instead of measuring predominantly quantitative aspects? Will the Commission advance the implementation of this in line with the review/revision of the MFF? What arrangements could the Commission implement in order to urge Member States to implement this budget performance agenda at national and local level?
