

**Question for written answer E-015467/2015
to the Commission**
Rule 130
Nicola Caputo (S&D)

Subject: The circular economy

The 2014 Circular Economy Package called for a 70% recycling target for municipal waste by 2030 and a total ban on landfills for all recoverable and reusable waste.

However, according to recently leaked documents, the new Circular Economy Package would require only a recycling target of 65% and would even allow a 10% share to be sent to landfill.

Does the Commission confirm or reject these new data? Will it raise or lower the targets and ambitions set out in the 2014 Circular Economy Package?
