Subject: State aid in the Romanian energy market

Illegal state aid and lack of transparency at national level as regards government involvement in commercial transactions are pressing concerns in Romania. The Commission should support the Romanian Government in achieving a truly competitive market with appropriate levels of aid.

What is the current status of case CF SA.37713 – SA.37713 (2013/CP) concerning alleged illegal state aid granted to Electrocentrale Group SA? When does the Commission plan to adopt a final decision?
