Subject: Follow-up to question E-006799/2015

With reference to the reply to written question E-006799/2015, we wish to inform the Commission that Mirabello and Binengo are in fact the same place, which has simply changed its name.

Last month, the public prosecutor in Cremona, following an inspection by the Environmental Operations Unit of the Carabinieri police in Brescia, opened an investigation into this landfill.

This contradicts the statement by the Italian authorities, namely that the landfill has been shut down and reclaimed.

What measures will the Commission take, given that this landfill is actually covered by the judgment of the Court of Justice of the EU in Case C-196/13C?
