Subject: Combating alcoholism in the EU

Alcohol consumption has been identified as a major risk factor for the burden of disease and premature death both at global level and in the WHO European Region. A recent report found that alcohol was responsible for 1 in 7 male deaths and 1 in 13 female deaths in the 15-64 age group.

In the light of this situation, what practical support will the Commission provide for NGOs working to combat alcohol consumption?

How should schools incorporate education aimed at combating alcohol consumption?
