

Question for written answer E-015281/2015
to the Commission
Rule 130
Norbert Erdős (PPE)

Subject: GMO and antibiotics content of feedstuffs imported into the EU

At present the EU imports annually more than 30 million tonnes of soya, soya flour, and dried maize husks (also known as distiller's dried grains with solubles (DDGS)), to fulfil its feedstuffs requirements. Last year the quantity was 32 million tonnes.

I have the following questions for the Commission:

1. According to the Commission's data, what quantity of GMO soya, from which third countries, was imported into the EU each year during the period 2009 to 2014?
2. According to the Commission's data, what quantity of GMO DDGS, from which third countries, was imported into the EU each year during the period 2009 to 2014?
3. What quantity of imported GMO soya and DDGS was intercepted in Member States' official tests on the grounds of its antibiotics content during the period 2009 to 2014?
