Subject: Role of the EU in plans to deepen the Oder

In the light of plans to deepen the Oder, I would like to ask the Commission to give a separate answer to each of the following questions:

1. What amount of funding, taken from which budget lines, have the Commission and the European Investment Bank earmarked or promised to earmark for the deepening of the Oder?
2. What justification was given for the award of the funding in each case, with particular regard to environmental and flood protection?
3. What cost-benefit analyses, environmental impact assessments and strategic environmental assessments have been drawn up with regard to each of the interventions?
