

Question for written answer E-015645/2015
to the Commission
Rule 130
Edward Czesak (ECR)

Subject: Work on delegated acts under Article 60 of Regulation (EU) No 305/2011

Article 60 of Regulation (EU) No 305/2011 of the European Parliament and of the Council of 9 March 2011 laying down harmonised conditions for the marketing of construction products and repealing Council Directive 89/106/EEC confers on the Commission the power to adopt delegated acts. This is essential in order to remove or avoid restrictions on making construction products available, and, at the same time, to take account of technical progress and any regulatory changes.

The Commission's recent report to Parliament and the Council on the exercise of the power to adopt delegated acts mentions work that is in progress on the preparation, adoption or publication in the *Official Journal of the European Union* of the following acts:

1. a regulation on the classification of reaction to fire performance;
2. a decision on the assessment and verification of constancy of performance (AVCP) systems for ventilation ducts and pipes;
3. a decision on the AVCP systems for geosynthetic products.

In the light of the foregoing, what is the state of play with regard to the work on the documents concerned, and when are they expected to enter into force?
