

**Question for written answer E-015932/2015  
to the Commission**

Rule 130

**Mairead McGuinness (PPE)**

Subject: Electromobility in the EU

In the light of the rising interest in the use of electric cars in the Member States, what steps has the Commission taken to create the market conditions needed to break Europe's oil dependency and decarbonise transport?

By 2020, 7 % of all new European passenger and light commercial vehicles (LCV) should be electric, with this number increasing to 31 % by 2030. How does the Commission plan to achieve this ambitious goal?
