Subject: Multi-purpose migration centre in Niger

According to the European Agenda on Migration, the EU intends to establish a multi-purpose migration centre in Niger by the end of 2015. This centre is intended to cooperate with the UN High Commissioner for Refugees and the International Organisation for Migration, to provide information on genuine opportunities for third country nationals to obtain protection in the EU, and to provide various types of support. Available information shows that the centre will not process asylum applications or other forms of protection of third country nationals in the EU.

On what precise date will this centre be brought into operation?
